

CHAPTER : AREA AND PERIMETER

Perimeter Questions (1-10)

1. Find the perimeter of a rectangle with length 12 cm and width 8 cm.
2. What is the perimeter of a square whose side is 9 m?
3. Calculate the perimeter of a triangle with sides 5 cm, 7 cm, and 6 cm.
4. A rectangular field measures 50 m by 30 m. Find its perimeter.
5. If a square has a perimeter of 28 cm, find the length of one side.
6. Find the perimeter of a rectangle 15 units long and 10 units wide.
7. A triangle has sides measuring 4 cm, 9 cm, and 11 cm. What is its perimeter?
8. Calculate the perimeter needed to fence a square park with side 25 m.
9. A rectangular garden is 20 m long and 12 m wide. Find the perimeter.
10. The perimeter of a triangle is 18 cm. If two sides are 5 cm and 7 cm each, find the third side.

Area Questions (11-20)

11. Find the area of a rectangle with length 14 cm and width 5 cm.
12. What is the area of a square with side 7 units?
13. Calculate the area of a rectangular field that is 40 m long and 25 m wide.
14. A square table has a side of 6 m. Find its area.
15. Find the area of a rectangle whose length is 18 units and width is 9 units.
16. If the area of a square is 49 square cm, find its side length.
17. A rectangular playground measures 60 m by 35 m. What is its area?
18. Calculate the area of a square garden with side 12 m.
19. A rectangle has an area of 72 square units. If its width is 8 units, find the length.
20. Find both the perimeter and area of a square with side 10 cm.

Perimeter Word Problems (1-10)

1. A rectangular room measures 8 meters in length and 6 meters in width. Find the total length of wire needed to go around its boundary once.
2. A square park has each side equal to 12 meters. Calculate the perimeter if a fence is to be installed around it.
3. A triangular signboard has sides measuring 9 cm, 10 cm, and 11 cm. What is the total length of ribbon required to frame it completely?
4. A farmer wants to fence a rectangular field that is 75 meters long and 50 meters wide. How much fencing material will be needed?
5. The perimeter of a square flower bed is 36 meters. Determine the length of each side.
6. A playground shaped like a rectangle measures 40 meters by 25 meters. Find the distance covered if someone walks around its edge.
7. A triangular plot of land has sides of 15 m, 20 m, and 25 m. Calculate its total perimeter.
8. To enclose a square garden with side 18 meters, find the total length of the boundary wire required.
9. A rectangular swimming pool is 30 meters long and 15 meters wide. What is the perimeter of the pool?
10. A bookshelf forms a rectangle 120 cm high and 90 cm wide. Find the perimeter to cover it with decorative tape.

Area Word Problems (11-20)

11. A rectangular carpet is 10 meters long and 4 meters wide. Calculate the area it covers on the floor.
12. A square tile has each side measuring 8 cm. Find the total area covered by one such tile.
13. A farmer's field measures 120 meters in length and 80 meters in width. What is the total area of the field?
14. A square tablecloth has sides of 2.5 meters. Determine the area it occupies.

15. A classroom blackboard is rectangular, 6 meters long and 3 meters high. Find its total surface area.
16. The area of a square plot is 121 square meters. Calculate the length of one side.
17. A rectangular park is 90 meters long and 60 meters wide. What area does it cover?
18. A square courtyard has each side equal to 15 meters. Find the total area available.
19. A rectangular room has an area of 240 square meters. If its width is 12 meters, find the length.
20. A garden bed forms a square with side 9 meters. Calculate both its perimeter and area.
